# MBIS5015Team: Minutes of Capstone Project Meeting

AUSTRALIAN INSTITUTE
OF HIGHER EDUCATION
CRICOS Provider Code: 03147A

Team Name: Team 6 (AIH INSIGHTS)

Meeting Date: 28 October & 4 November

Meeting time: 12 PM-1 PM
Chair: Diya grover
Recorder of Minutes: All of the team members
Present: All team members with the client were presented.
Apologies: NIL

**Matters arising from previous meeting:** During the initial client meeting, the project requirements were thoroughly discussed and clarified. The client provided a detailed explanation of the system's objectives and desired functionalities. All team members reviewed and agreed upon the specified requirements to ensure a common understanding of the project scope.
Following this, the client shared eight sample datasets to be used for testing and demonstration purposes. To maintain data confidentiality and comply with privacy standards, the client instructed the team to anonymzing all datasets. Accordingly, the task was evenly distributed among the four team members, with each member responsible for anonymzing two datasets.
In the second meeting, the client outlined the structural design of the application, specifying the need for three main pages:

Login Page – to allow secure user authentication.

Upload Data Page – to enable users to upload and process datasets.

Result Page – to display analytical outcomes and processed data results.

The client also stated that the team was free to implement the solution using any programming language or framework they were most comfortable with, allowing flexibility in the choice of technologies.

## Discussion Items and Decisions Made :

### First Client Meeting

**Discussion Items**: The client provided a comprehensive explanation of the overall project objectives and requirements. Clarified the main functionality expectations for the application. Shared eight sample datasets to be used for testing and demonstration. Discussed the importance of data privacy and confidentiality, emphasizing that all datasets must be anonymized before use. Outlined the expected workflow of the system and key deliverables.

**Decisions Made:**

All team members agreed on the project scope and deliverables.

The eight datasets were divided equally among the four members, assigning two datasets per member for anonymization. The team confirmed the use of Excel (.xlsx) files for testing and demonstration.

### Second Client Meeting

**Discussion Items:**

The client provided detailed requirements for the application's user interface and page structure. Discussed the functionality to be implemented in each page (Login, Upload, and Result). Clarified expectations regarding usability, responsiveness, and data handling. Addressed the choice of development tools, frameworks, and technologies.

**Decisions Made:**

The application will include three main pages:

Login Page – for secure authentication.

Upload Data Page – to upload and select datasets for processing.

Result Page – to display analytical results based on selected data.

Team members agreed to use React.js as the primary development framework due to its modularity and ease of component-based design.

XLSX.js library will be used for reading and processing Excel files.

Tailwind CSS and custom CSS will be applied for styling and responsiveness.

Each member will handle one main page, with shared responsibility for integration and testing.

| Action No. | Action | Assigned to whom | Due date |
|---|---|---|---|
| 1. | Review and understand client's project and requirements. | All team members | 2 November (Week2) |
| 2. | Collect and analyse the eight sample datasets provided by the client. | All team members(Datasets was divided 2 into each individual to analyse and anonmyze) | 3 November (Week3) |
| 3. | Developing login page for authentication. | Joyab/Diya | 10 november (Week 4) |
| 4. | Applying CSS styling for designing and ensure responsiveness. | Sofiyan/Diwanshu | 10 november (Week 4) |
| 5. | Integrating all pages into a single working application using react router. | All team members | 10 november (week 4) |
| | | | |

Date for next meeting: 11 November___Time for next meeting:____11 AM_____

Location for next meeting:_____Online via Zoom_____ ___
